

Our family wishes to let the FCC know that we are against the replacement of FM translator service with the Low Power FM service. Our issue is that we believe there is room for both.

My husband and I want to make our opinion known. K-Love provides us and our teenage children with music alternatives that are uplifting both spiritually and socially. We don't have to worry about language or off-color jokes being a "norm" as entertainment.

K-Love provides these same attributes for the community, again providing a wholesome environment. This service provides a very positive alternative to the graphic and often crude humor and conversation that so many public radio stations spew out on the airways.

Please do not replace our access to K-Love.

Sincerely,

Debbie Dutton
